October 20, 2013 – As published in the Naperville Sun

National Railroad Safety Services opened its first Illinois office at 1601 Bond St., Naperville, in July.

This office provides experienced personnel to perform railroad flagging duties, and also equipment, cell phones, railroad radios, personal protective equipment, derailleurs, flags, whistles, air horns and fuses. Established in 1999, NRSS has other offices in Cincinnati, Ohio, and Dallas, Texas.

“We are always looking to have offices in strategic locations that meet our needs and allow us to serve more clients; this new space with DynaCom (property management company) provides us with just that,” said Debby Shepherd, president of NRSS. “We had a lot of expectations and the space on Bond Street has exceeded every one.”
